

Minimax Exercise

1. Give the values calculated by minimax for all states in the tree. Do not use alpha-beta pruning.

2. Indicate which branches of the tree will be pruned by alpha-beta pruning

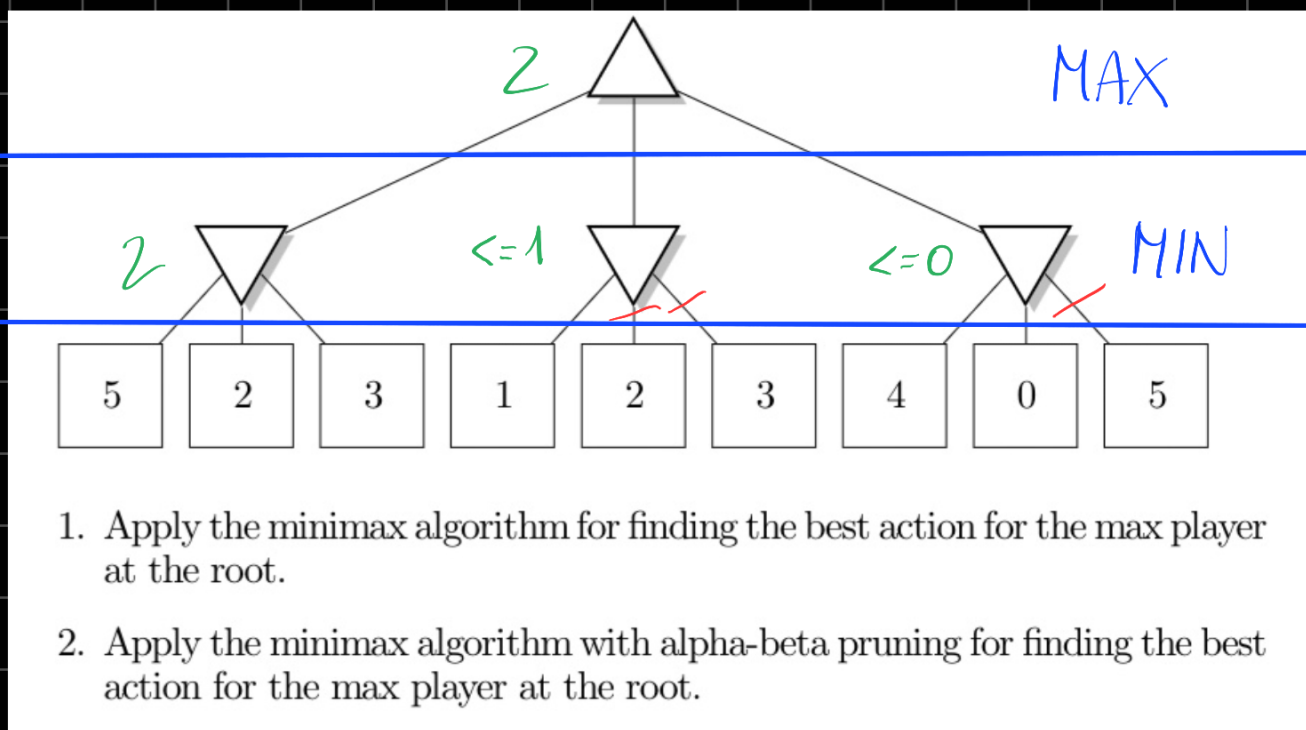

La prossima mossa sarà la prima, quella con valore 2.

MAX = \triangle
MIN = ∇

La mossa scelta sarà la prima: quella con valore 2.

La mossa scelta sarà la prima: quella con valore 2

Viene scelta la prima mossa: quella con valore 2
